

Journal of Applied Engineering Science & Technology, JAEST

Problematic soil mechanics in the Algerian arid and semi-arid regions: Case of M'sila expansive clays

M. Khemissa, A. Mahamedi, L. Mekki

Numerical study of geogrid-reinforced segmental earth retaining wall

O. Rahmouni, A. Mabrouki, D. Benmeddour, M. Mellas

Stability analysis of the extended Kalman filter for Permanent Magnet Synchronous Motor

Djamel Taibi, Abdenacer Titaouine, Fateh Benchabane, Ouafae Bennis

Applicability of solar desiccant cooling systems in Algerian Sahara: Experimental investigation of flat plate collectors

Adnane Laped, Amar Rouag, Adel Benchabane, Noureddine Moumami, Mohammed Zerouali

Study of the behavior of bridges under seismic loads considering soil-structure interaction

Mohamed Baheddi, Youcef Youb
